

# SALT SYSTEM & COASTAL POOLS MUST HAVE AN INLINE ZINC ANODE

- ★ Protect valuable pool equipment such as heaters of all types: gas, electric, heat pumps, prevent corrosion caused by stray current/ galvanic corrosion
- ★ Helps prevent plaster discoloration, heater damage, and black stains
- ★ No pipe required. Inline zinc anode for new installations, for 2" pipes, 5.2ft cooper wire included.
- ★ The transparent housing allows you to check the zinc anode corrosion at any time, easy to replace (anodes need to be replaced approximately every 3 years).
- Available upon request from your pool Contractor or Amazon - <https://www.amazon.com/briidea-Install-Inline-Anodes-Saltwater/dp/B09YH4BM4W>
